

Passion Projects

Sculpture

The following dresses were passion projects that I developed over a two year period. Each piece was intricately folded by hand and crafted from recycled materials. The human skeletal system was a huge inspiration for me and I wanted to reflect each individual piece that creates the whole of a person. Either physically, mentally, or emotionally. Between these three dresses there are thousands of pleats, and modular origami. Each small piece is beautiful on its own, but together they create something spectacular.
